Although the game wasn't that fun at first, they did improve it a lot so now it's a good time to write a review.

If you are not familiar with hardcore games this is going to be a nightmare for you. Often times you don't know where you are getting shot from, and a single bullet can end your life and it doesn't need to be a LMG or a Sniper. If you are familiar with Arma 3 or even Battlefield, you can get into this game quick, but if you are a casual player or like to play fast games, this is not for you.

Pros:

- Good graphics, Unreal Engine at its finest
- Gun mechanics are on point
- Gun sounds are amazing
- Class system is balanced and designed well
- No bugs (at least from my experience)
- Map designs are overall good
- Vehicle mechanics are also done well
- Fairly priced cosmetic DLC's

Cons:

- The game might crash on loading screens
- Some of the maps are somewhat unbalanced
- People can get kicked by someone bluffing
- Some of the players are doing a horrible job at their role, and sometimes people don't bother to kick the person
- Rarely servers can lag, and can lag hard
- Rarely sound can get glitched when things explode

Overall 7/10, it's a great game for a patient and competitive player. Promising looking game once it's complete. It needs a soundtrack and sound effects, also the swimming action looks a little weird when she's swimming she has her face in the water. I was thinking am I going to drown or will I make it to the other side?

Also there appears to be no way of making melee attacks on zombies like kicking and punching them at this time. Multiple camera angles would be a nice addition too.

Recommended as this is an early access game. Any bugs are likely to be fixed. Please mention them to the developer instead of just saying 'This game is cr*p' or something like that as that's of no help whatsoever. The slip indicator is not working, actually it does in the opposite way to the correct way. You get what you paid for, 5K achievements at minimum price. If you're an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don't waste your money. This is not a game, it's just a way of distributing achievements. Hacker Evolution is NOT a hacking game, but more something like: You must dig into the servers to find new servers, clues and other things that will help you. Something between exploration and detective. This game is more about thinking ahead. Stats like trace will be carried with you to the next level, so if you finish a level with 99% trace, it will be the same in next level. For people who like to play easy games this game is really frustrating, but for those which like challenges this is a perfect game.

Pros:

- + Great Soundtrack
- + Good Concept
- + Great UI (BUT it will not fit everyone)
- + Lots of fun if you like challenges
- + Great Story

Cons:

- Hardcore for some players (you have to restart whole game if you screw something up). Enjoyable chiptune music to play in the background as you play other games. Not much to be said, although a few tracks are oddly short. But to provide an example

I would have to be able to type the song titles which leads into another point worth making: all the song titles are in Japanese. Minor, but it also makes it hard to tell which ones I liked since I can't easily sort them by title. But all in all good music. Edit: They fixed the song titles.. ***NOTE: Review based on first three sections, I got to the modelling and realised this was too advanced for me. I will update this review when I can continue when I have a bit more basic knowledge***

I have given this a thumbs up as it really is organised and goes through the introduction to Blender well. I do find however that this might not be for beginners such as myself. The tutorial goes through the settings and different tool quite nicely, but when this moves on to modelling the example, he moves a bit too quickly and I think you need to be alot more familiar with 3D modelling to fully understand what is going on and to be able to follow. This was perhaps my mistake for not understanding what this was properly before purchase. I do aim on returning to this once I have developed my skills a bit better.

How do i play this game? :p. What a fun, realxing game. Beautiful music, pleasing visuals, and a fun little adventure.. Play the second game instead.. I played this game before the other two and I loved it...so I bought those and will be playing this again. This game is a nonlinear horror that had me tense all the time and scared a lot of the time. Though the game is nonlinear, there are some things that need done before you can move on. Sometimes, what needs to be done is not obvious so you pretty much have to go around and try different things until you can move on. There is a quite wonderful guide on Steam (I'm sorry I don't remember the name of the one who made it, but qudos to you). This is definately not a game for children. The game has two endings and several very interesting easter eggs about hauntings and weird happenings around the area of the game. I really liked that and looked to collect them all. Some of the mechanics of the game are a little hard to work with (like moving things), but keep trying and some of the puzzles (like "conversations with...") were downright frustrating. All in all, even though I needed some help, I had a great time. Thanks to the devs and all for a great scare, and another and another..... This is an ARPG featuring waves of enemies in various arenas. You kill enemies, collect loot of various rarity and either sell off or donate excess gear to factions which provide various bonuses upon reaching each tier. As you level up you get stat points which you can put into 3 different attributes. You have stash in town where you can hoard artifact (think legendary) rarity loot for other characters. The story features you having to fight your way through gladiator style arenas in the Biblical era & locations though the story does not have a Biblical focus like their first game in this series.

GRAPHICS: Looks good for the genre. Armor you equip is fully visible on your character. There is some clipping here and there. With a GTX 970 and all textures, shadows and AA maxed @ 1080P I get 30-50 FPS depending on the amount of enemies on screen. There are a lot of options to adjust to suit your particular GPU.

COMBAT: This is the game's strongest feature. Though very repetitive like most ARPGS, there is a unique system of gaining skills depending on what type of weapon you have equipped. So if you are wielding a sword, a series of 4 different skills will gradually unlock as you use it. Equip an axe and 4 more different skills will show up on your hotbar and gradually unlock as you use the weapon. There are numerous types of 1H, 2H and ranged weapons and they all have 4 unique skills to unlock so there is variety in that. Combat animations are fast & smooth. My personal favorite so far is the 2H hammer with its powerful strikes, stuns and knock downs.

VALUE: For a \$5 game (\$4 for its launch week discount) you really can't go wrong. There will be bugs but the game appears complete and playable.

As someone who's played all the ARPGs and currently still plays a lot of Titan Quest: Anniversary Edition, I recommend this inexpensive indie ARPG.. A great addition for your desktop, which replaces monotonous pictures with beautiful views from space. You can watch the evolution in the space environment right on your monitor
