---

This was quite spicy

Pros

-Memes

-Harambe

-Autism

Cons

-Why Is Everything Typed With A Capital At The Start Of Every Word

Overall I rate 8.7 out of 10. Beautiful work like always. The cars are magnificent, handles and feels really great. The work done with the systems of the F1 like KERS, DRS and especially ERS for the SF15-T is remarkable. Worth the price, thank you !. At first a little irritating when you're new and trying to figure out how everything works. and then restarting for the 100th time. Otherwise still really fun., I'm invested heavily into my party already. This is probably my favorite Choice Game ever. It's not without some faults, though. I feel like Exodus: Part 2 was unusually short, unlike the first one which was rather on point with detail. 2: Focuses more on confirming relationships and working with the group. And surviving without your home. in the woods and discovering a future antagonistic group..

My favorite background for my character is Teenager actually. Just because I feel like it adds more impact and weight to the story. However I will say I tried a few other backgrounds and Hacker is pretty ridiculously overpowered. Seriously, you can hack into ATMS to get momey, street & school cameras to get you a better idea what you're facing, also because of your hacker background you know more about the virus and how the government came to possibly create it. (You work with an underground network with other hackers, more or less.) It's not really a complaint just something I noticed while playing.

Teenager naturally is pretty nerfed because your character is so young, but it also makes it only much more impressive when your teen character kicks♥♥♥♥♥ I guess that's another reason as why I like playing teen. Being able to have a dog companion is also tight as hell and is something often brought up no matter where your character is. I'd definitely recommend training your dog regularly if you plan on making your character have a dog. There's a lot of options to customize and roleplay your character (Stats, Flaws, Weapons, Dialogue) , which I love probably the most about this game.

Overall, enjoyed it. Hope the next installment comes out soon.. Awesome game. Really nice graphics. Just a visually stunning game. But also extremely terrifying. It made me never want to step in the ocean again.

Anyway, I really enjoyed playing the game. Has a really interesting and well done story line.

I would highly recommend this game if you have a PC to run it. 10/10. I love all the Delicious and Fabulous games. This one is no exception. Very cute story, appearances by our beloved Delicious characters and a cute soundtrack.

It's an addictive and fun time management game brought to you by GameHouse who never fails to put out great games that are just fun to play or when you need a break from your more strategic, graphic intense games.. Bought this on a whim while it was on sale for less than a dollar, very happy that I did so and would even have enjoyed it at full price.

It's a simple little puzzle game where the only input you have is when your character jumps, but they manage to take this concept and use it to create all sorts of brain teasers that'll have you scratching your head for a while. On top of this, the ASCII-style of the game is surprisingly gorgeous, and the music that plays throughout is quite relaxing and beautiful.

It's not perfect though; the traps you encounter often do not appear to be programmed with set patterns, which sometimes results in unavoidable deaths thanks to sheer bad luck. It's not a dealbreaker by any means, but it can be a bit frustrating to die several times through no fault of your own.

That being said, this is a really enjoyable little gem that I'd absolutely recommend to anyone as a fun way to kill an afternoon.. A blast with a dark sense of humour. Lazy cashgrab dlc. Once again the Galdbeck team dissapoint us with another failed addon. The map itsself is of really poor quality, the roads look cheap the textures are once again overlapping, splines are overlapping objects are overlapping. Roundabouts are not round. It seems the makers dont like to make thing round they always have to

---

have a corner on them. No spanish AI traffic, German voices when getting on the bus even doh we are in spain.

The streets are empty most of the time, route 1 is 40mins long, but 15mins of that route you are stuck at a red light. i have driven the route 1 and have no desire to drive anymore on this map, if i could get a refund i would!

Wait for London. What the hell is with the homoeroticism in ths game? The icon looks like a♥♥♥♥♥♥♥♥  
farting♥♥♥♥♥♥♥♥looking huds. WTF is going on?

Check my screen shots, you can see a dilaogue box...

"You control the ball with blow and suck" ROFL

If you like subtle homosexual programming... not that there's anything wrong with that?..?.. then this game is for you!

---

I've been playing this game for a long time and it is so much fun.

10/10 would buy again. why I cant play on my win7 computer\uff1f when I launch the game the screen show pink color. Simple matching game that runs smoothly and doesn't offer much to stand out from the rest. However, if you're looking for a simple, casual, and relaxing game of match then this fits the bill perfectly. The price is right, especially if you can find this on sale. The achievements are simple to get, though the arcade mode portion takes quite a grind to get to. Overall, not a bad indie game that is worth your while.. What a wonderful experience! Not a game. More like a poem.... so at first this looks like a lovely, perfect, peaceful yuri vn. at the start it tells you to relax and enjoy but thats a big lie. ive been through so many ups and downs and heartbreak and love and crying and laughing and frustration, i don't even know what im feeling anymore.

would reccomend for every gay girl. theres 3 more games after this so ill have to pick up the broken pieces of my heart by then... sob sob...
